**Pivot 1696**

Support 1702/1696/1691/1686

Resistance 1708/1713/1718/1724

Possible Range 1690 to 1720**Trading Tips**

Short positions may be opened below 1708 with targets at 1702/1696 and stop-loss at 1714

FKLI Jan month jumped 16.5 points or 0.98% to closed at 1701.5. The buying momentum on the FBM KLCI is picking up speed as investor risk appetite improved amid confidence over the health of the global economy.

The Dow Jones index rose 86 points to close at 49590 on previous session. Wall Street stock indexes and U.S. government bonds steadied on Monday as traders digested the Trump administration's threat to indict the Federal Reserve, although renewed questions about the independence of the world's most influential central bank weighed on the dollar and boosted gold.

The active FKLI contract surged higher and broke above the key resistance level at 1,700, indicating a continuation of the upside bias. In the shorter time frame, the index may experience a technical correction if it fails to break above the next resistance zone at 1,708–1,710, potentially pulling back toward the 1,702 or 1,696 range. However, holding above the 1,696–1,698 support zone would remain supportive of the prevailing upward momentum. Immediate support and resistance levels are identified at 1702 and 1708, respectively.
