Technical Commentary:

After surging sharply higher and peaked in August 2024, price took a breather. A mild pullback took place and price turned into a long-term consolidation pattern, hovering mostly above EMA120. Following the recent pullback, price has formed a bullish candle to close above all moving averages. Traders may monitor for a potential breakout above RM1.85 to target the next resistances located at **RM1.92-RM2.00**. Downside wise, support is envisaged at **RM1.75**.
