Technical Commentary:

Price is on the rebound mode after finding stability in November 2024. After gradually marching higher, price took a mild breather and pullback before bouncing off EMA120 to stage a recovery and the uptrend formation was re-established lately. For now, traders may anticipate for a potential breakout above RM1.52 to target the next resistances located at **RM1.60-RM1.65**. Downside wise, support is pegged at **RM1.42**.
