Technical Commentary:

Price has peaked in early 2025 before staging a correction. Price appears to have bottomed out after hovered around the EMA9 and EMA20 levels. Coming closer, price underwent a short-term consolidation and has recently climbed above all moving averages to re-establish the uptrend formation. For now, traders may watch for a potential breakout above RM2.72, which could open the path toward the next resistance levels at **RM2.83–RM3.00**. On the downside, immediate support is identified at **RM2.53**.
