Technical Commentary:

The share price remains in an established uptrend, having only briefly dipped below the SMA200 in April and again in July before regaining momentum. Price is consolidating above the EMA20 after a breakout above RM4.50, with a pullback to RM4.22 on lighter volume. A rebound from this level could validate a breakout-pullback-continuation setup toward the next resistance at **RM4.50–RM4.65**, while key downside support lies at **RM4.12**.

Technical Commentary:

The stock remains in an uptrend since June, advancing while staying above the SMA200. Since mid-August, the stock has entered a consolidation phase under a descending trendline, though it continues to hold above the EMA9 and EMA20. A breakout above RM1.74 would signal the end of consolidation and revive upside momentum toward **RM1.80–RM1.85**. On the downside, immediate support is located at **RM1.69**.
