Technical Commentary:

KJTS broke out of its prolonged rectangular consolidation between February and August. After reaching a high of around RM1.19 in September, the stock has undergone a pullback within a descending wedge, retesting its previous breakout level. A rebound from this support could signal a resumption of the uptrend, with the MACD approaching a bullish crossover and the RSI recovering from near-oversold territory.

We expect further upside towards **RM1.09** and **RM1.16**, while the stop-loss is set at **RM0.905.**

Technical Commentary:

Aemulus surged to a high of around RM0.48 in August before entering a prolonged consolidation within a symmetrical triangle over the past two months. The narrowing price range reflects converging resistance and support, with a breakout above RM0.470 potentially signalling a continuation of the uptrend. The MACD is stabilising near the signal line, while the RSI is hovering around 50, suggesting scope for bullish momentum to strengthen upon a breakout.

We expect further upside towards **RM0.510** and **RM0.555**, while the stop-loss is set at **RM0.425**.
